Cancer Research and Treatment (Cancer Res Treat) is a peer-reviewed publication of the Korean Cancer Association. Cancer Research and Treatment is published quarterly on the 15th January, April, July, and October. Cancer Research and Treatment accepts manuscripts for submission under a broad scope of topics relevant to experimental and clinical cancer research. Subjects include carcinogenesis, tumor biology, molecular oncology, cancer genetics, tumor immunology, epidemiology, predictive markers and cancer prevention, pathology, cancer diagnosis, screening, and therapies including chemotherapy, surgery, radiation therapy, immunotherapy, gene therapy, multimodality treatment, and palliative care. Physicians or researchers throughout the world can submit a manuscript if its scope is appropriate.

Manuscripts for submission to Cancer Research and Treatment should be prepared according to the following instructions. Cancer Research and Treatment follows the Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Writing and Editing for Biomedical Publication (http://www.icmje.org/urm_main.html), commonly known as “Vancouver style” if not otherwise described below.

1. RESEARCH AND PUBLICATION ETHICS

The journal adheres to the ethical guidelines for research and publication by the International Committee of Medical Journal Editors (ICMJE).

Registration of Clinical Trial Research
It is recommended that any research dealing with a clinical trial be registered on an appropriate online public registry. Manuscript with non-registered interventional clinical trials will not be considered for publication.

Conflict-of-Interest Statement
The corresponding author must inform the editor of any potential conflicts of interest that could influence the authors’ interpretation of the data. Examples of potential conflicts of interest are financial support from or connections to pharmaceutical companies, political pressure from interest groups, and academically related issues. In particular, all sources of funding applicable to the study should be explicitly stated.

Ethical Statement
All of the manuscripts should be prepared in strict observation of research and publication ethics guidelines recommended by the International Committee of Medical Journal Editors (ICMJE, http://www.icmje.org/). Any study reporting the results of human subjects or human data must be conducted according to the principles expressed in the Declaration of Helsinki, and must be reviewed and approved by a responsible institutional review board (IRB). The authors should describe the title and approval number of the IRB, and should describe about informed consents from the participants in “Ethical Statement” subsection in Materials and Methods section. Copies of written informed consent and Institutional Review Board (IRB) approval for clinical research should be kept. If necessary, the editor or reviewers may request copies of these documents to resolve questions about IRB approval or study conduct. All studies involving animals must state that the guidelines for the use and care of laboratory animals of the authors’ institution, or any national law, were followed.

Data Sharing Statement
CRT accepts the ICMJE recommendations for data sharing statement policy (http://icmje.org/icmje-recommendations.pdf). All manuscripts reporting clinical trial results should submit a data sharing statement following the ICMJE guidelines.

Description of Participants
Ensure correct use of the terms sex (when reporting biological factors) and gender (identity, psychosocial or cultural factors), and, unless inappropriate, report the sex and/or gender of study participants, the sex of animals or cells, and describe the methods used to determine sex and gender. If the study was done involving an exclusive population, for example in only one sex, authors should justify why, except in obvious cases (e.g., prostate cancer). Authors should define how they determined race or ethnicity and justify their relevance.

Authorship
Authorship credit should be based on 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; 3) final approval of the version to be published; and 4) agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved. Each author should meet these four conditions.
Instructions for Authors

1. ORIGINAlITY AND Duplicate Publication

All submitted manuscripts should be original and should not be considered by other scientific journals for publication at the same time. No part of the accepted manuscript should be duplicated in any other scientific journal without the permission of the Editorial Board. Submitted manuscripts are screened for possible plagiarism or duplicate publication by CrossCheck upon arrival. A letter of permission is required for any and all material that has been published previously. It is the responsibility of the author to request permission from the publisher for any material that is being reproduced. This requirement applies to text, figures, and tables.

2. MANUSCRIPT CATEGORIES

2.1 Original Articles

Original Articles are the primary presentation mode of scientific communication in the journal. Acceptance of manuscripts is based on many factors, including the importance of the research to the field of oncology and the originality of the work. Authors are encouraged to focus on accuracy, clarity, and brevity in their presentations.

2.2 Review Articles / Editorials

Review Articles and Editorials are usually solicited by the Editor-in-Chief. However, unsolicited Review Articles will also be considered for publication, in which case authors should submit their curriculum vitae in addition to the manuscript. Editorial should be no more than five pages in length.

2.3 Special Articles

Special Articles include those manuscripts for which content and style do not fall under the category of Original Articles or Review Articles; these may include, but are not limited to, guidelines, summaries of consensus meetings, and other scholarly communications.

2.4 Case Reports

Case Reports are not encouraged and are considered only if justified by their unique significance or depth of studies on the case. The abstract should be unstructured and its length should not exceed 150 words. There should be no more than five figures, including tables, and no more than 15 references.

2.5 Correspondences

The Editors welcome any form of brief and short articles on general interests for cancer researchers. These include brief case reports, brief communications, comments on topics of interest, readers’ comments on articles published recently in the journal, and authors’ replies. It should not exceed 400 words, 5 references, 3 authors and 1 table or figure.

3. PEER REVIEW PROCESS

The acceptance criteria for all papers are based on the quality and originality of the research and its clinical and scientific sig-
nificance. An initial decision will normally be made within 4 weeks of receipt of a manuscript, and the reviewers’ comments are sent to the corresponding authors. Revised manuscripts must be submitted online by the corresponding author. The corresponding author must indicate the alterations that have been made in response to the referees’ comments item by item. Failure to resubmit the revised manuscript within 12 weeks of the editorial decision is regarded as a withdrawal.

4. ELECTRONIC SUBMISSION

Manuscripts are submitted online to Cancer Research and Treatment via our Online Submission Site (http://journal.cancer.or.kr). Submission instructions are available at the website. All articles submitted to the journal must comply with these instructions. Failure to do so will result in return of the manuscript and a possible delay in publication. For assistance please contact via e-mail (journal@cancer.or.kr).

5. MANUSCRIPT PREPARATION

General Guidelines

Manuscripts must be written succinctly in clear, grammatical English. All manuscripts originating from non-English speaking countries must be revised by a professional linguistic reviewer, and it must be evident from the cover letter that this has been done. All manuscripts are subject to editorial peer review. The editors reserve the right to improve the style and, if necessary, return the manuscript to the author for revision. When a manuscript is received for consideration, the editors assume that no similar paper has been or will be submitted for publication elsewhere. The main document with manuscript text and tables should be prepared with MS Word file.

• The manuscript should be written in 12-point font with double-line spacing on A4 size with standard margins.
• All manuscript pages are to be consecutively numbered, beginning with the title page as page 1.
• The use of acronyms and abbreviations is discouraged and should be kept to a minimum. When used, they are to be defined where first used, followed by the acronym or abbreviation in parentheses.
• Drug and chemical names should be stated in standard chemical or generic nomenclature. Units of measure should be presented according to the International System (SI) of units.

Reporting Guidelines for Specific Study Designs

For the specific study design, such as randomized control studies, studies of diagnostic accuracy, meta-analyses, observational studies and non-randomized studies, it is recommended that the authors follow the reporting guidelines listed in the following table.

<table>
<thead>
<tr>
<th>Initiative</th>

Manuscript format

Although there is no limitation on the length of these manuscripts, the Editorial Board may abridge excessive illustrations and large tables. The manuscript for an original article should be organized on a separate page in the following sequence: title page, abstract and keywords, text, conflicts of interest, acknowledgments (if necessary), references, tables, and figure legends.

1) Title page

The title page should carry the following information.

• Manuscript title, which should be concise but informative.
• Each author’s name (given name, middle name, and surname) followed by the highest academic degree.
• The name of the department(s) and institution(s) where the work was conducted.
• A running title of fewer than 50 characters.
• The complete mailing address, telephone, facsimile, and e-mail address of corresponding author.

2) Abstract and Keywords

The abstract should be no more than 250 words, and describe concisely, in a paragraph, the Purpose, Materials and Methods, Results, and Conclusion. Below the abstract,
authors should provide 3 to 10 keywords or terms to be used as index terms. Terms from the Medical Subject Headings (MeSH) list (https://meshb.nlm.nih.gov/search) should be used; if suitable MeSH terms are not yet available, current terms may be used.

3) Text
The text should be structured and arranged in this order: Introduction, Materials and Methods, Results, and Discussion. Footnotes are to be used only for tables and figures. Identify precisely all drugs and chemicals used, including generic name(s), dose(s), route(s) of administration, and city and country of manufacturer. Use only standard abbreviations. A subject that is to be abbreviated must be spelled in full for its first use in the text, followed by the abbreviation in parentheses.

4) Conflicts of Interest
All potential conflicts of interest must be stated within the manuscript. This pertains to relationships with pharmaceutical companies, biomedical device manufacturers, or other corporations whose products or services are related to the subject matter of the article. Such relationships include, but are not limited to, employment by an industrial concern, ownership of stock, membership on a standing advisory council or committee, being on the board of directors, or being publicly associated with the company or its products. Other areas of real or perceived conflict of interest could include receiving honoraria or consulting fees or receiving grants or funds from such corporations or individuals representing such corporations.

5) Acknowledgments
If necessary, persons who have made substantial contributions, but who have not met the criteria for authorship, are acknowledged here. All sources of funding applicable to the study should be stated here explicitly.

6) References
In the text, references should be cited with Arabic numerals in brackets and numbered in the order cited. In the references section, the references should be numbered in order of appearance in the text and listed in English. The total number of references should be less than 30. Any article longer than these limits should be discussed with the Editor. List all authors if there are less than or equal to six authors. List the first six authors followed by “et al.” if there are more than six authors. If an article has been published online, but has not yet been given an issue or pages, the digital object identifier (DOI) should be supplied. Journal titles should be abbreviated in the style used in Medline. Other types of references not described below should follow Citing Medicine: The NLM Style Guide for Authors, Editors, and Publishers (available from: http://www.nlm.nih.gov/citingmedicine).

7. ADDITIONAL INFORMATION

Copyright
All published papers become the permanent property of the Korean Cancer Association. Upon acceptance of the manuscript, the authors will be required to sign a statement confirming that the manuscript contains no material the publication of which violates any copyright or other personal or proprietary right of any person or entity.

Article Processing Charge
Article charges are required for publication in the Cancer Research and Treatment. These cover some of the costs of publication as well as open access online editions in the journal website (http://www.e-crt.org) or in the PubMed Central (http://www.ncbi.nlm.nih.gov/pmc/journals/915/). Invoice will be sent to the corresponding author when the submitted article is finally accepted. The charge is USD 600 per article, and USD 300 for case report, correspondence or erratum.

Page Proofs
Corresponding authors are provided with page proofs and are asked to carefully review them for data and typesetting errors. When proofs are available, the corresponding author will receive a notification. Corrections to proofs must be returned as soon as possible. Publication may be delayed if proofs are not returned by the publisher’s deadline.
These checklists must be completed during the manuscript submission. Please see Instructions for Authors for details related to these checklists.

☐ 1. Type in 12-pitch, ragged-right margin, double-spaced throughout.
☐ 2. Sequence of title page, abstract and keywords, introduction, materials and methods, results, discussion, references, and tables and figure legends.
☐ 3. Title page includes (1) manuscript title, (2) category, (3) name and academic degree of each author, (4) affiliation, (5) running title of fewer than 50 characters, and (6) mailing address, telephone, facsimile and E-mail address of corresponding author.
☐ 4. Abstract with four specified subtitles in less than 250 words.
☐ 5. References should be less than 30 (15 in case report) and numbered in order as cited in the text.
☐ 6. Tables have a title not longer than 15 words.
☐ 7. All tables and figures are cited in the text.
☐ 8. Each figure as separate files, in EPS, TIFF or JPG format, minimum 300 DPI.
☐ 9. Each figure has a title and an explanatory legend as needed.
☐ 10. Number of tables plus figures does not exceed 10.
☐ 11. Each necessary permission approved by the appropriate source.
☐ 12. Description of title and number of IRB approval (when reporting results on human subjects).
☐ 13. Description about the informed consent (when reporting results on human subjects).
☐ 14. Elucidations of research or project support / funding (if applicable).
☐ 15. Copyright transfer form completed by the corresponding author.

By signing below, I hereby transfer to the Korean Cancer Association the exclusive rights comprised in the copyright of this work. For the copyrights of the contributions, see Creative Commons (Attribution-Noncommercial) at http://creativecommons.org.
