

(A)

(B)

S2 Fig. Inhibition of gastric cancer cell growth by AZD1208 treatment. (A) Cells were incubated with different concentrations of AZD1208 for 120 hours, and an MTT assay was performed. Cell survival was calculated as a percentage and is presented as a graph with standard error bars ($n=3$). (B) AZD1208 suppressed colony formation of gastric cancer cells. Cells were treated with various concentrations of AZD1208 every 3 days for 14 days. The resulting colonies were stained and counted.
