

S2 Table. Detailed characteristics of postoperative radiotherapy

| Characteristic | Value (n=250) |
|---|------------------|
| Period | |
| 2003-2006 | 21 (8.4) |
| 2007-2011 | 96 (38.4) |
| 2012-2016 | 133 (53.2) |
| Radiation field | |
| Breast/Chest wall | 31 (12.4) |
| Breast/Chest wall+SCLN | 117 (46.8) |
| Breast/Chest wall+SCLN+IMN | 102 (40.8) |
| Radiation dose (Gy) | |
| Breast/Chest wall dose | 50.4 (40-60.4) |
| SCLN dose | 50.4 (40-64) |
| Fraction size (Gy) | |
| Breast/Chest wall | 1.8 (1.8-3.0) |
| SCLN | 1.8 (1.8-3.0) |
| Interval, PTR~postoperative radiotherapy (mo) | 1.4 (0.5-36.9) |
| No postoperative chemotherapy (n=148) | 1.1 (0.5-4.8) |
| Postoperative chemotherapy (n=102) | 4.4 (0.7-36.9) |

Values are presented as number (%) or median (range). IMN, internal mammary lymph node; PTR, primary tumor resection; SCLN, supraclavicular lymph node.
