

S8 Fig. Progression-free survival and overall survival analysis among patients with monotherapy versus combination endocrine therapy maintenance and switch versus continuum endocrine therapy maintenance in multicenter cohort. Progression-free survival (A) and overall survival (B) analysis in patients with monotherapy or combination maintenance therapy of endocrine therapy. Progression-free survival (C) and overall survival (D) analysis in patients with switch or continuum maintenance therapy of endocrine therapy. CI, confidence interval; HR, hazard ratio.
