

**S1 Fig.** Prognostic value of serum  $\beta 2M$  in the risk groups determined by PINK. Progression-free survival according to serum  $\beta 2M$  levels ( $< 4.1$  mg/L vs.  $\geq 4.1$  mg/L) in the PINK low-risk group (A), PINK intermediate group (B), and PINK high-risk group (C).  $\beta 2M$ ,  $\beta$ -2 microglobulin; PINK, Prognostic Index for Natural Killer Cell Lymphoma.
