
S8 Fig. Area under the curve (AUC) for gastric cancer (GC) prediction models in the validation set according to cancer types. Model 1: polygenic risk score for GC (PRS-GC) and PRS for alcohol consumption (PRS-Alcohol). Model 2: conventional risk factors (age, sex, body mass index, smoking, salted food intake, family history of GC, *Helicobacter pylori* and alcohol consumption). Model 3: Model 2+PRS-GC+PRS-Alcohol. p-values were obtained using DeLong's test.
